ID: 5050428450029 | **Work permit:** Romanian | **Date of birth:** 28/04/2005 |

Place of birth: Sector 5, Bucharest, Romania | **Nationality:** Romanian | **Gender:** Male |

Phone number: (+40) 763669987 (Mobile) | **Email address:** danielpetrescu50566@gmail.com |

Facebook: Petrescu Daniel | **Whatsapp Messenger:** 0763669987 |

Address: Street Codrii Neamtului number 66, Block N19, Entrance 1, 4th Floor, Apartment 14, 032431, Sector 3, Bucharest, Romania (Home)

ABOUT ME

My name is Petrescu Daniel-Adrian, I am 21 years old, and I am currently a second-year student at the National University of Science and Technology Politehnica Bucharest, within the Faculty of Electronics, Telecommunications and Information Technology. I am passionate about engineering and eager to continuously develop my technical skills while learning new things every day. I am a hardworking, highly motivated person with a strong desire for learning, self-improvement, and professional growth.

EDUCATION AND TRAINING

30/09/2024 – CURRENT Bucuresti, Sector 5, Romania

STUDENT UNSTPB

Bachelor's Degree in Electronics Engineering, Telecommunications and Information Technology:

Faculty of Electronics, Telecommunications and Information Technology

This is a highly demanding academic program focused on developing advanced knowledge and practical skills in electrical and electronic engineering. Throughout the program, we study engineering techniques, technologies, and applications across various fields of electronics, telecommunications, and information technology.

Address Splaiul Independenței nr. 313, sector 6, București, ROMANIA, RO-060042, Bucuresti, Sector 5, Romania |

Website www.upb.ro | **Field of study** Information and communication technologies not elsewhere classified |

Level in EQF EQF level 1

24/05/2024 – 25/05/2024 Bucuresti, Romania

VALEDICTORIAN – CLASS OF 2024

I graduated from the 12th grade as Valedictorian of the Class of 2024, an achievement earned through consistent academic performance, discipline, and active involvement in school activities. I was also awarded the symbolic “Key of the High School” in the 11th grade in recognition of my outstanding academic results and exemplary dedication to learning. These accomplishments reflect my seriousness, strong organizational skills, perseverance, and continuous desire for personal and professional development.

DRIVING LICENCE

Driving Licence: AM

Driving Licence: B1

Driving Licence: B

VOLUNTEERING

23/09/2021 – 22/06/2023 Bucharest

"Our Voice Matters"

Within this project, I contributed to raising awareness about the daily challenges faced by people with disabilities, as well as the determination, resilience, and perseverance they demonstrate in their everyday lives. The experience helped me develop stronger empathy, communication, and teamwork skills, while also reinforcing the importance of inclusion, respect, and social responsibility within the community.

HOBBIES AND INTERESTS**Literature**

I am highly interested in the Spanish language and literature, and I am currently attending a Spanish language course to further improve my skills. In addition, I read A1-level books in Spanish in order to better understand the fundamental principles of the language and expand my vocabulary. I am motivated to continuously improve my communication abilities and gain a deeper understanding of Spanish culture, which also helps me develop adaptability, discipline, and intercultural communication skills.

Technical Interests

I am also passionate about embedded systems, microcontrollers, and modern technologies used in the semiconductor industry. I enjoy exploring how hardware and software interact in real-world applications and I am eager to deepen my knowledge in areas such as automotive electronics, IoT systems, and intelligent electronic devices. I am motivated by innovation and enjoy solving technical challenges while continuously improving my practical engineering skills.

PROJECTS

01/07/2026

IPCEI Project – Microelectronics

I was selected to be part of the European IPCEI (Important Projects of Common European Interest) project as a Microelectronics Technician (Student), due to my active involvement in academic activities and projects carried out within the faculty. This opportunity reflects my strong interest in the field of microelectronics, as well as my dedication, responsibility, and desire for professional growth in an environment focused on innovation and advanced technologies. My role is A1(8.2-8.7) Microelectronics Technician(Student)

02/10/2025 – 23/01/2026

CAD Project for Electronics – 0–10V Voltage Indicator

Within this project, I designed and developed a PCB for a 0–10V voltage indicator based on the Texas Instruments LM3914 integrated circuit. The system was capable of monitoring and displaying voltage levels using 10 LEDs operating in both Dot Mode and Bar Graph Mode.

In addition, I built and tested the prototype circuit to ensure proper functionality and reliability according to the project specifications. During the development process, I gained practical experience in PCB design, electronic schematics, circuit prototyping, soldering, and hardware debugging. This project also strengthened my attention to detail, problem-solving abilities, and understanding of analog electronic circuits and voltage monitoring systems.

20/12/2025 – 10/01/2026

Multisensor Station with RFID System

Within this project, I designed and implemented a prototype circuit for an intelligent multisensor station using an Arduino Mega 2560 development board. The system was capable of collecting and processing data from multiple sensors, including temperature and humidity, sound, light intensity, distance, and alcohol detection sensors. The project also integrated an RFID authentication system for secure access control, allowing the station to be used only by authorized users. In addition, I implemented visual and acoustic feedback through LEDs, an LCD display, and a buzzer, improving the interaction between the user and the system.

During the development process, I worked with embedded programming, sensor integration, electronic prototyping, hardware-software interaction, and real-time data processing. This project helped me strengthen my practical engineering skills, problem-solving abilities, teamwork, and understanding of embedded systems and IoT-oriented applications.

20/04/2026 – 23/05/2026

Database Project – Hotel and Restaurant Management

Within this project, I designed and implemented a relational database for managing hotel and restaurant reservations within an online platform. The system was developed to store reservations, customer reviews, booking history, and user account information.

I worked on database design, relational modeling, SQL implementation, table relationships, and data normalization. This project helped me improve my SQL, database management, analytical thinking, and problem-solving skills.

29/02/2024 – 29/02/2024

ASUS Learn & Compete 2024 Municipal Competition

Within this competition, I learned the fundamental ICT concepts that form the basis of computer operating systems, as well as the main structure and components of a computer system. The experience also helped me improve my technical knowledge, logical thinking, teamwork, and problem-solving abilities while working in a competitive and educational environment.

25/06/2025 – 30/09/2025

Summer School IT

Within this project, I developed multiple applications using the ISSNW Complete Arduino Starter Kit, which included an Arduino Mega 2560 development board. Among the projects I created were a digital Breathalyzer, a Morse Code Flashlight, and a VU Meter, along with many other practical electronics and embedded systems applications.

These projects helped me improve my programming, circuit design, prototyping, and problem-solving skills, while also giving me hands-on experience with sensors, LEDs, displays, and embedded systems development.

The Google Drive link containing the projects is attached below.
